

Octal	To Binary
10	1000
77	111111
144	1100100
377	11111111

Manual Explanation:		
To convert an octal number like 377 to binary:		
1. Translate each digit like decimal from right to left to binary		
3	7	7
011	111	111
2. Join right to left (you can ignore leftmost zeroes)		
11111111
