

## Home Task

### Activity 1: Correcting Parallelism Errors in Sentences

**Instructions:** Read each sentence carefully. Identify and correct the error in parallelism to ensure consistency and clarity.

1. The software development team must innovate new features, testing thoroughly, and ~~to~~ ensure compatibility across all platforms.

The software development team must innovate new features,  
test them thoroughly, and ensure compatibility across all  
platforms

2. The cybersecurity analyst's responsibilities include identifying security threats, analyze network vulnerabilities, and reporting findings to management.

The cybersecurity analyst's responsibilities include identifying  
security threats, analyzing network vulnerabilities, and  
reporting findings to management.

*Shahid*

3. To optimize performance, the engineers upgraded the hardware, configured the software, and conduct regular maintenance.

*To optimize performance, the engineers upgraded the ~~hardware~~ configured the software and conducted regular maintenance hardware,*

4. The data scientist's role involves collecting data, analyze patterns, and developing predictive models for future trends.

*↓  
analyzing.*

5. Debugging requires identifying coding errors, fixing bugs, and to ensure seamless functionality of the application.

*↓  
ensuring.*

6. Artificial intelligence is revolutionizing industries by automating tasks, improving efficiency, and to reduce operational costs.

*↓  
reducing.*

7. In software engineering, designing user interfaces involves usability testing, gathering user feedback, and creating intuitive layouts.

*↓  
testing usability.*

*Signature*

## Activity 2:

**Instructions:** Read each sentence carefully. Identify and correct the error in parallelism to ensure consistency and clarity.

1. The financial analyst conducts market research, preparing reports, and to present findings to clients.

2. Blockchain technology offers transparency, security features, and can enable faster transactions.

3. FinTech startups aim to disrupt traditional banking models, innovate new financial products, and to attract venture capital funding.

4. The risk management team identifies potential threats, analyzing data trends, and implementing strategies to mitigate risks.

5. Cryptocurrency trading involves understanding market volatility, analyze price movements, and to make informed investment decisions.

6. Regulatory compliance requires adhering to laws, reporting financial activities accurately, and to maintain transparency.

7. Machine learning algorithms can process large datasets, make predictions accurately, and can learn from patterns.

remove can!

### Activity 3:

**Instructions:** Read each sentence carefully. Identify and correct the error in parallelism to ensure consistency and clarity.

1. The marketing team is responsible for developing campaigns, analyzing market trends, and to implement strategies effectively.

↓  
implementing

2. Effective leadership involves setting goals, delegating tasks, and ensuring team collaboration.

Already Correct.

3. Business ethics courses teach students about ethical decision-making, understanding corporate responsibility, and how to apply in real-world scenarios.

↓  
applying in

4. Successful entrepreneurs possess traits such as resilience, adaptability, and able to take calculated risks

↓  
ability

5. Financial planning includes setting financial goals, budgeting expenses, and to invest wisely for the future.

↓  
investing

↓  
investing

*John*

6. Human resource management involves recruiting talent, training employees, and can improve workplace culture.

*⇒ improving*
